VISION

BI FACT LLC (Also referred as BIFACT) provides Business Intelligence solutions by utilizing technologies and applications for gathering, providing access to and analyzing data to ensure that enterprise users make better decisions. BIFACT enables organizations to have a comprehensive knowledge of all the factors that affect business decisions. The primary objective is to develop timeliness and quality of information, thereby improving the overall performance. BIFACT's Business Intelligence expertise, highly qualified team of experts and extensive knowledge has proven to be a cost-effective and reliable solution for Federal and commercial clients.

BIFACT maintains a neutral position to Business Intelligence platforms, allowing them to provide exceptional solutions for their clients. By utilizing the latest in technology and software application development, BIFACT has provided compliance, program management, and time tracking applications.

BIFACT headquarters office is conveniently located to the metropolitan Washington D.C. area, located in Chantilly, Virginia. This location supports development, sales, services, training and staff augmentation.

BACKGROUND

BIFACT is a minority owned, SBA small business 8(a) Business, operating in the United States. Since inception in 2006, BIFACT has served a wide variety of government and private agencies such as, US Army, FDA, DOD, SSA, etc. BIFACT has 150+ collective years of experience and knowledge in Information Technology, Business Intelligence and Application Development. Mr. Mekap assisted in design and implementation of dozens of data warehouses, directing projects to formally evaluate more than 30 of the available Business Intelligence products. He has implemented Business Intelligence products, solutions and migrations since 1995 and worked with the primary Business Intelligence vendors.

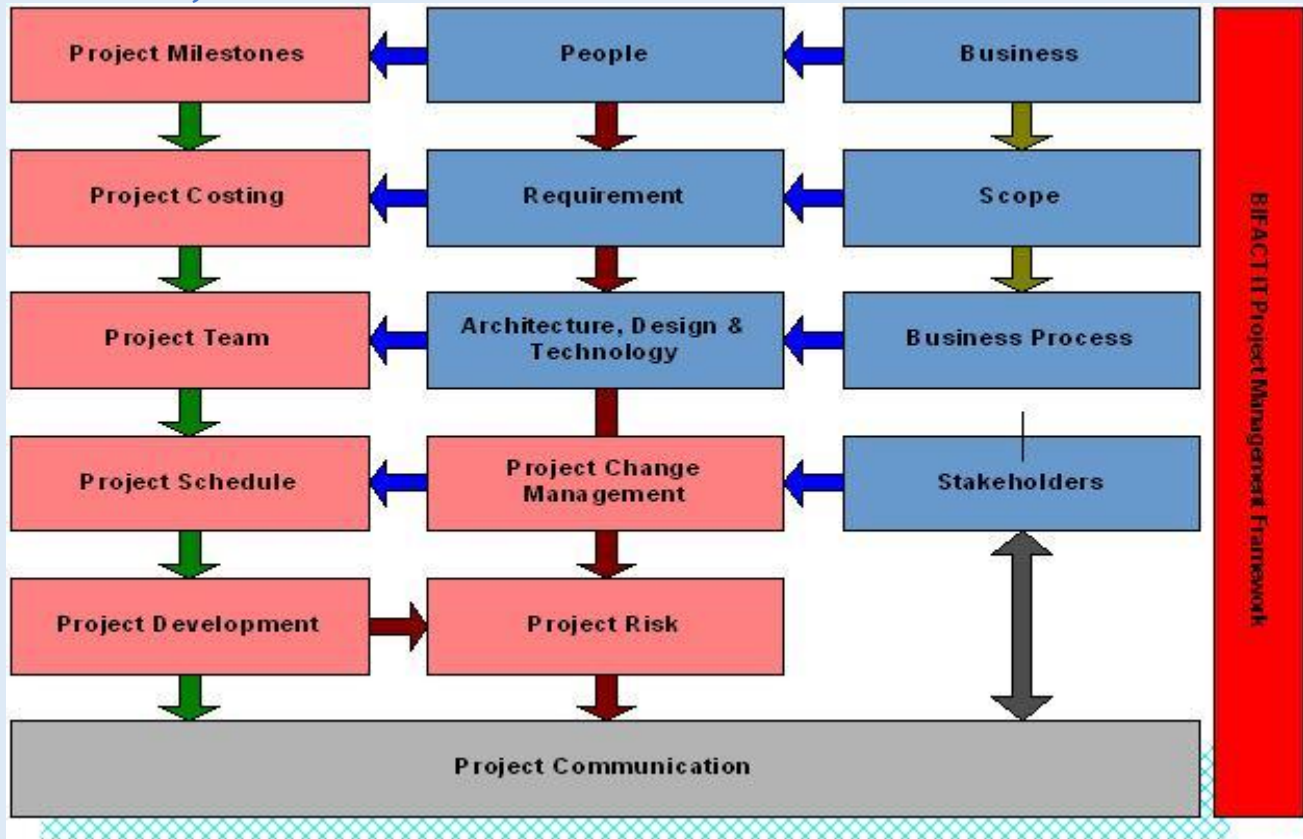

VISION

To be recognized as one of the primary Business Intelligence and Enterprise Reporting solution providers in the country, providing high quality professional solutions, systems integration and software development services that will offer strategic value to our customers by extracting pertinent information and turning that data into knowledge.

US ARMY	American Red Cross
FDA	Orange/Equant/GlobalOne
DOD	Sonawane WebDynamics Inc.
SSA	Nortel Govt. Solutions
EPA	Northrop Grumman
Freddie Mac	

BIFACT PROJECT MANAGEMENT FRAMEWORK

BIFACT's flexible project management framework enables us to adapt to any methodologies followed by our organization. Your business and people are main drivers for any new or change is application.

We understand your business to identify the scope and meet with your people to identify the requirement which enables us identify the milestones and enable us to come up with cost.

Understanding your requirement & business process enables us to decide on the architectural, design approach and selection of technology as well as identification of business stakeholders.

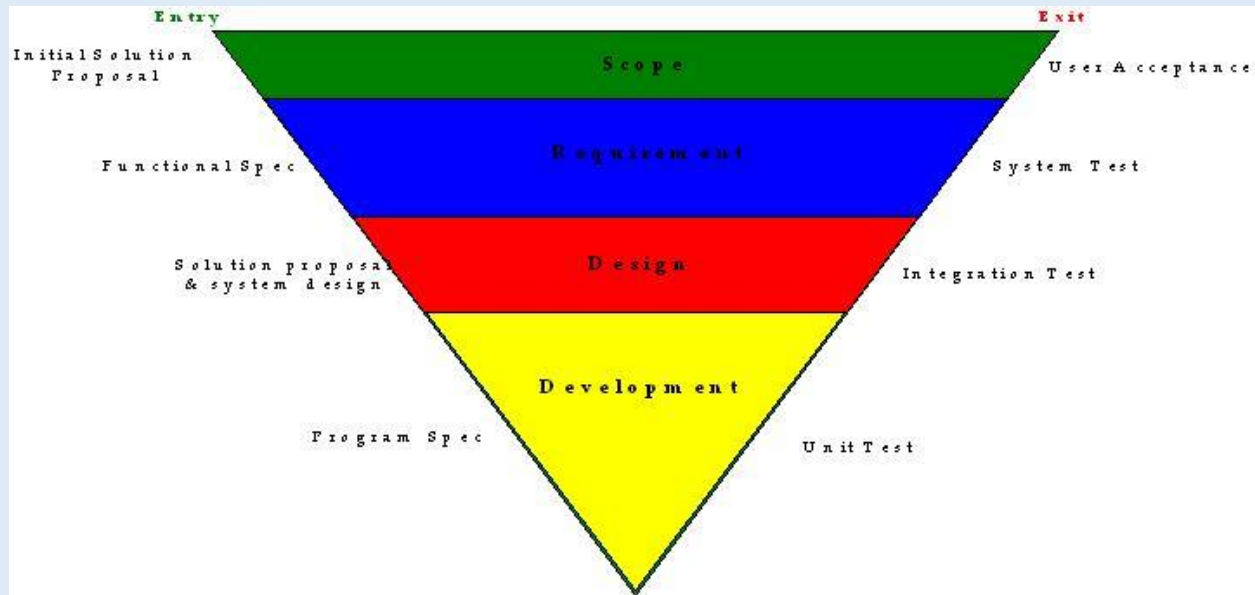

Identification of architecture, technology and costing guides us to assemble a project team, which enables us to achieve the objective of the project while staying within the budget.

As depicted in this framework, it enables us in identifying the milestone, cost, team, schedule, and change management, risk and communication management process.

BIFACT METHODOLOGY

V- Process Model

This model is applicable to standard where entry and exit criteria are defined before entering into any stage of software lifecycle. This methodology is application in new or major enhancement to application

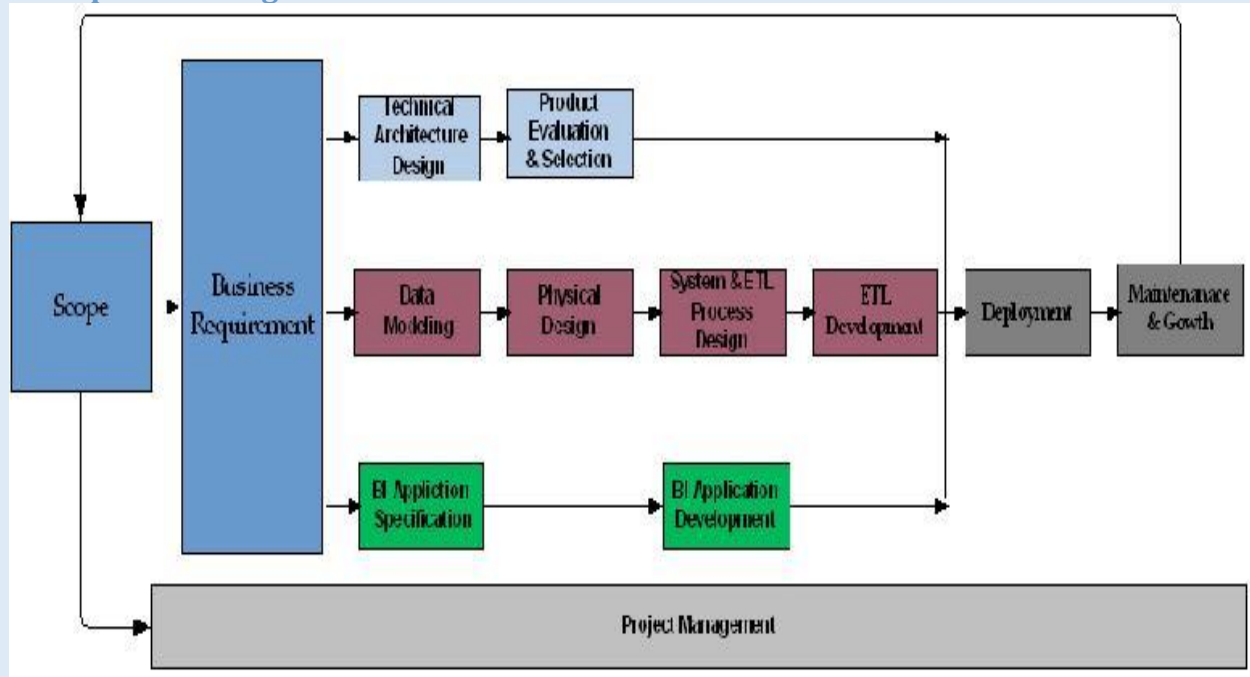

Maintenance Model

Our maintenance model is follows two distinct methodology: Waterfall Methodology, which follows the V-Process model. Agile Method, which follows some of the process of the V-Process model but depending on the necessity some of the steps, are omitted to meet the deadline. Our maintenance model consists of:

- Identifying the scope
- Prepare a maintenance plan.
- Develop & deliver.
- Project completion.

Enterprise Intelligence Model

This model is applicable for large enterprise intelligence system, whether building a data warehouse or a business intelligence system. BIFACT can assist in all or any of the three broad activities:

- Architecture
- Data warehouse
- Business Intelligence application
